

## **Certified Safety Specialist(CSS)**

1. **Products put on the market must be reasonably safe and fit for the ordinary purposes for which they are marketed. This is the fundamental principle underlying:**
  - A. Strict liability
  - B. **Breach of implied liability**
  - C. Liability without fault
  - D. Negligence
  
2. **Manufacturing records of products produced are maintained for the following reasons:**
  - A. To comply with the Consumer Product Safety Act and other legislation
  - B. To be able to trace product manufacture and facilitate a recall if necessary
  - C. To demonstrate a company's commitment to quality and comply with ISO 9000 requirements
  - D. **All the above**
  
3. **Your company has convened an "all-hands" company meeting. Mr. John Boss, the CEO, will be delivering the "state-of-the-company" Address. Nearly 400 employees are expected to attend. What would be the best presentation technique for this scenario?**
  - A. Mostly lecture sprinkled liberally with business-related graphs
  - B. Mostly lecture with no visual aids
  - C. **Some lecture, some high-level graphs, some multimedia presentations with video and audio**
  - D. Mostly multimedia video and audio with minimal input from Mr. Boss
  
4. **In Escola v. Coca Cola Bottling Company of Fresno, Justice Traynor pointed out that a manufacturer must know that its product is "fit". Fitness can be determined by the manufacturer by analysis and by:**
  - A. Examination
  - B. Demonstration
  - C. Test
  - D. **All of the above**

5. **As a safety professional, you are concerned with professional liability. Your company has insurance for the errors and omissions of its employees. Does this Insurance actually cover you for your errors and omissions made as an employee of this company?**
- A. Yes, completely
  - B. Yes, partially
  - C. **No**
  - D. Safety professionals are not subject to such liability
6. **What is the purpose of organizations such as Underwriters' Laboratories (UL) and Factory Mutual (FM)?**
- A. To perform independent product safety evaluations on products sold to consumers
  - B. To certify that products sold to consumers meet a minimum level of product safety
  - C. To certify that safety-related products will perform as expected
  - D. **All of the above**
7. **In worker's compensation cases involving hearing loss. The term low fence is often heard. Low fence also varies by state. What is the meaning of this term?**
- A. Minimum noise level the worker must be able to hear
  - B. **Hearing threshold level at which impairment begins**
  - C. Minimum acceptable dollar value related to the loss
  - D. Maximum acceptable dollar value related to the loss
8. **What is the principle that holds a manufacturer liable for injuries caused by unintended use of the product?**
- A. Strict liability
  - B. Negligence
  - C. Negligence per se
  - D. **Foresee ability**
9. **The term "underwriter" was generated from:**
- A. **Early Insurance contracts on ships and their cargo**
  - B. Factory Mutual publications
  - C. The property insurance industry in the United States
  - D. Lloyd's of London publications
