3.2 Tips and Scheduling Study Time

Develop a methodical approach to studying each domain. This can be accomplished by organizing your study time. Candidates report they spend between 60 and 200 hours on average preparing for the exam.

3.3 Review Sample Examination Questions

Some sample questions will be provided once the application is accepted which will give you an indication of the style of questions that will be asked, the type of thinking required and the degree of difference between incorrect and correct answers.

Once you have failed the exam and are willing to resit the questions will be different.

3.4 Control Examination Anxiety

Part of controlling anxiety involves being prepared for what to expect. Here are some tips:

Prior to the examination:

- Know your material. Spend adequate time studying for the certification exam.
- Ensure you get enough sleep, good nutrition, exercise, personal downtime, etc. Think positively.

On the day of the examination

- Allow yourself plenty of extra time to log in to the portal,
- Make sure to check the internet connection before the exam time
- Make sure the camera is working and is ready for the exam
- Dress comfortably the candidate must be alone in the room where the exam will be conducted. We will conduct a 360-degree check.
- We use screen recreation recording technology to 'record' the candidate's Chrome window throughout the exam and monitor candidates through interval captures of their entire desktop and their webcam.
- We also use Live invigilator proctoring or we combine powerful AI analysis with a 'human-in-the-loop' approach to ensure that suspicious activity can be quickly identified, with a trained human proctor being involved in the final decision-making process.
- During the examination
- Relax. Practice relaxation techniques such as deep breathing.
- Do not focus on any anxiety you may be experiencing.

- Do not expect to know all the answers. It is unlikely that a candidate will answer all questions correctly. Use your reasoning ability to analyse the question and identify the best possible answer.

4 EXAMINATION STRATEGY AND SCHEDULING

4.1 Certification Examination Overview

PEEB offers Computer-Based Tests (CBT) only. PEEB offers a minimum of one exam on the 15th of every month or as per requirement only in English language.

- Computer-Based Test - CBT

4.1.1 Computer-Based Test – CBT

Computer-based exams are provided electronically via the PEEB Exams applications. The use of electronic devices, such as tablets and cell phones, is not allowed. The exam session is supervised remotely by a PEEB Invigilator via the PEEB Exams application, and an external/integrated camera in the online test. Access will be granted on test day after submitting your exam fee.

4.2 Examination Strategy

The examination consists of 50 questions by CBT or PBT and 2 hours to complete. Each question consists of 2 marks and 100 marks for the whole examination. It is required to get 50% marks (50 out of 100) to pass a certification examination.

The questions are presented in any of the following formats:

- Case-based (a set of questions associated with a brief scenario)
- Independent questions (stand-alone examination questions that contain the information necessary for responding).
- Matching Columns
- Fill in the Blanks
- True and False
- MCQ's

Candidates should thoroughly review the Blueprint for the selected certification exam.

The Examination Committee is responsible for determining the PEEB certification content and the examination specifications, maintaining examination questions and setting the passing score.

4.3 Developing an Examination Strategy

Candidates who want to sit in the Certified Lifting Inspector Examination must have a thorough knowledge of all the 8 domains. It takes time to adequately prepare for an examination.
